

Project ReadMe

- 1) Unzip the zip file
Unzip proj2.zip
- 2) cd proj_root
- 3) ls

01_baseline.ipynb 03_pipeline.ipynb compression utils 02_compression.ipynb
04_deployment.ipynb Optimization and Mobile Deployment of a UdaciSense Object Recognition Model.pdf

01_baseline.ipynb → contains baseline model implementation

02_compression.ipynb → implementation of compression techniques

03_pipeline.ipynb → contains implementation of pipelines

04_deployment.ipynb → contains conversion of optimized model to mobile format

Optimization and Mobile Deployment of a UdaciSense Object Recognition Model.pdf → This is the technical report with C Level executive summary

ReadME will also be placed in this directory.

utils and compression folders contain supporting functions.

You can run the commands in notebook files in order. Everything should execute as mentioned.
